Compiler Construction Assignment

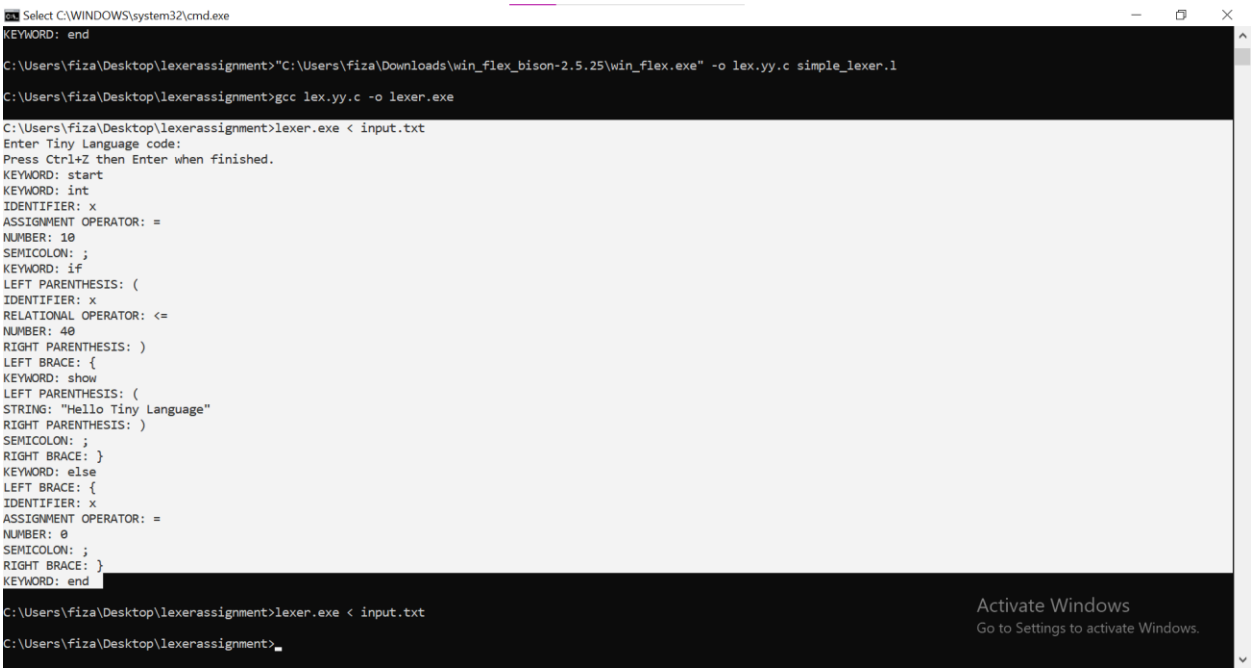

Project: Lexer (Lexical Analyzer) Using FLEX

Objective: To identify tokens such as keywords, identifiers, numbers, operators, strings, and separators from a sample program.

Input Program: input.txt

Output: The screenshot below shows the tokens recognized by the lexer, including the keywords if, else, and int.

Output screenshort:

Output of input.text:

C:\Users\fiza\Desktop\lexerassignment>lexer.exe < input.txt

Enter Tiny Language code:

Press Ctrl+Z then Enter when finished.

KEYWORD: start

KEYWORD: int

IDENTIFIER: x

ASSIGNMENT OPERATOR: =

NUMBER: 10

SEMICOLON: ;

KEYWORD: if

LEFT PARENTHESIS: (

IDENTIFIER: x

RELATIONAL OPERATOR: <=

NUMBER: 40

RIGHT PARENTHESIS:)

LEFT BRACE: {

KEYWORD: show

LEFT PARENTHESIS: (

STRING: "Hello Tiny Language"

RIGHT PARENTHESIS:)

SEMICOLON: ;

RIGHT BRACE: }

KEYWORD: else

LEFT BRACE: {

IDENTIFIER: x

ASSIGNMENT OPERATOR: =

NUMBER: 0

SEMICOLON: ;

RIGHT BRACE: }

KEYWORD: end
